

1. Install XAMPP(Windows users) or MAMP(Mac users).
2. Go to "localhost/phpMyAdmin" through a web browser bar (Firefox or Chrome, etc.). If you have any problem follow the tutorials on Session 5 slides.
3. Make a new database like "Movie_shop", in phpMyAdmin.

4. Make a new account for Movie_shop. The username and password in phpMyAdmin like the fig. above. In "Movie_shop" database, make the same tables like TP1 and use the same data for the tables.
5. In the application folder, find hotdogs folder. Inside this folder, make a .html file which is called: TP5_yourname.html. This webpage has an empty field and a button.
6. To create html or php files you can simply use notepad or other text application. However, you need to save it with .html or .php extensions.
7. Also, make a php file which is called: TP5_yourname.php. Your html file should call this webpage in it. We connect to our database (phpMyAdmin: Movie_shop) by this file to run the queries 1..5.
8. Finally, you have to two weeks to submit these **two files (.html+.php)** together on the Moodle platform. The scheduled deadline is 08/04/2019 until 08:30 am.
